Critical thinking

Adaptability and flexibility

Teamwork

Profile

I'm a Front-end developer specializing in creating unique web applications. I strive to create immersive, beautiful, user-friendly websites and web applications with quality and well-designed code. I'm working on improving interactive design based web applications using animations and smooth transitions. I enjoy challenging myself and doing interesting, challenging and important tasks. I actively continue to develop my skills not only towards the Front-end, but also towards the Back-end.

Experience

Front-end Developer (Personal websites & web applications)

March 2020 - Present

- Developed and maintained code for client websites primarily using HTML, CSS (SASS) and JavaScript;
- Manually tested sites in various browsers and mobile devices to ensure cross-browser compatibility and responsiveness;
- Wrote modern, performant, maintainable code for websites and web applications.

Achievements: engineered and implemented five adaptive websites, five JavaScript applications and e-commerce project using React.
